EDUCATION

Bachelor of Computer and Information Science – Ain Shams University Sep. 2023 – Jun 2027
Cairo, Egypt GPA: 3.3 Major: Computer Science

RELEVANT COURSEWORK

Structured Programming Analysis & Design of Algorithms Machine Learning OOP
Data Structure Computer Architecture Database Management Artificial Intelligence
Natural Language Processing

EXPERIENCE / INTERNSHIPS

Full Stack Training at DEPI 2025 – Present
Full Stack .NET Trainee Cairo, Egypt

- Building full-stack web applications using ASP.NET Core, C#, SQL Server, HTML, CSS, and JavaScript.
- Applying MVC architecture and RESTful API concepts in real-world projects.
- Collaborating on team projects using GitHub for version control and project management.
- Developing responsive user interfaces and backend systems as part of the Digital Egypt Pioneers Initiative (DEPI).

PROJECTS

Movie Popularity Prediction | *Python, Scikit-learn, XGBoost, Random Forest, Streamlit* May 2026

- Built a machine learning pipeline to predict movie popularity levels using a dataset of nearly 1M movies.
- Applied preprocessing, feature engineering, feature selection, and multi-label genre encoding.
- Trained and compared ML models including XGBoost, Random Forest, Logistic Regression, and Naive Bayes.
- Developed a Streamlit web application for real-time predictions.

Resume Intelligent Processing System | *Python, FastAPI, Qdrant, LangChain, LLaMA-3, Docker* May 2026

- Developed a RAG-based resume retrieval system for semantic candidate search.
- Processed and indexed 2,400+ resumes into 42,000+ vectorized text chunks using LangChain and Qdrant.
- Integrated LLaMA-3-70B via Groq API to answer HR-related queries.
- Containerized the application using Docker Compose and exposed APIs through FastAPI.

Flosak Wallet System | *C++, Qt, JSON, OOP* May 2025

- Designed and developed a secure digital wallet system using C++ and Qt.
- Implemented authentication, money transfer, transaction history, and profile management features.
- Built admin functionalities for account management and transaction monitoring.
- Integrated password recovery with Python email verification and used JSON for persistent storage.

Water Potability Prediction | *Python, Scikit-learn, Streamlit, SMOTE* May 2025

- Built a machine learning model to classify water samples as potable or non-potable.
- Performed preprocessing including missing value handling, outlier removal, scaling, and SMOTE balancing.
- Trained and evaluated models including SVM, KNN, Logistic Regression, Decision Tree, and Random Forest.
- Developed a Streamlit application for real-time prediction.

Flight Reservation System | *Java, OOP* Dec 2024

- Developed payment and baggage management modules using object-oriented programming principles.
- Implemented booking validation, payment calculation, and excess baggage fee handling.
- Enhanced teamwork and software design skills through collaborative development.

Car Rental System | *C++, OOP* May 2024

- Developed a car rental management system for adding and listing available cars.
- Implemented efficient data handling for car details and rental availability.
- Improved programming and problem-solving skills through system design and implementation.

TECHNICAL SKILLS

Programming: C++, C#, Java, C, Python, SQL,
Web: HTML, CSS, JavaScript, Bootstrap, ASP.NET Core
Frameworks / Tools: Git/GitHub, Qt
Developer Tools: VS Code, Visual Studio, IntelliJ IDEA, Android Studio

SOFT SKILLS

Team Work	Collaboration	Active Listening	Time Management	Problem Solving
Stress Management	Creativity	Motivation	Adaptability	Leadership

LANGUAGES

Arabic: Native **English:** B2 (Upper-Intermediate)

LEADERSHIP / EXTRACURRICULAR

HR Member at SFE	2024 – Present
<i>Student Activity Member</i>	<i>Cairo, Egypt</i>

- Developed presentation and communication skills through collaborative activities and teamwork.
- Participated in organizing events and coordinating with team members to ensure smooth workflow.
- Enhanced leadership, problem solving, and time management skills in a professional environment.
